

State of the Nu-tion pre-meeting

Friday, 23 June 2017 - Saturday, 24 June 2017

Toronto

Scientific Programme

This discussion led workshop aims to bring experimentalists engaged in measuring neutrino cross sections together, to try and tackle some of the major issues which have arisen over a number of workshops over the last few years. We hope to reach some consensus between experiments on how best to produce cross section data with minimal biases due to interaction modeling or techniques for extracting measurements (efficiency corrections, unfolding methods).

Registration is not necessary, but to get an idea of the number of attendees, we would appreciate it if you would fill out this doodle poll. For information about accommodation, travel, visas etc, please refer to the information provided by the NuINT organizers elsewhere on this website.

There will be a small registration fee of \$30 (cash only) to cover the cost of refreshments etc.
