

Welcome to TRIUMF

Monday, 8 August 2022 10:00 (40 minutes)

I will present an introduction to TRIUMF with a brief overview of experiments at ARIEL and ISAC facilities covering both the current and the future envisioned programs. I will also discuss the theory program at TRIUMF that relates to the ARIEL experimental program. I highlight several recent experimental results from the nuclear astrophysics, nuclear structure, fundamental symmetries, and the sterile neutrino search.
