

NuInt 17: 11th International Workshop on Neutrino-Nucleus Scattering in the Few-GeV Region

Contribution ID: 148

Type: not specified

R Ratio Measurements from Jlab

We present results on the nuclear dependence ratio of R , the longitudinal and transverse structure function ratio. We present results on the difference between R_A (nucleus) and R_D (deuterium) for Carbon ($R_C - R_D$), Aluminum ($R_{AL} - R_D$), Iron ($R_{Fe} - R_D$) and Copper ($R_{Cu} - R_C$) for $Q^2=2, 3$, and 4 GeV^2 from electron scattering experiments at Jefferson Lab.
